

# Coatings for steelwork

Fabrication and shotblasting

## Coatings for fabrication and shotblasting

Axalta Coating Systems is a leading global coatings company focused 100% on the development, manufacture and sale of high performance liquid and powder coatings. Our innovative products and services include paint, colour matching tools, application technologies, customer training and business management systems.

### **Long UK Track Record**

The name 'Axalta' is relatively new to the UK fabrication and shotblasting markets. But if we mention our previous names - Protega, Tikkurila, Kemira, Macpherson Heavy Duty - you may recognise that we have been a leading supplier to the UK protective coatings market for many decades.

### **Technical Support**

Our highly experienced technical service personnel can assist with every aspect of your coating operations. Ask about our on-site process audit checks to help you optimise your painting processes.

### **Wide Product Range**

Minimising VOC's (Volatile Organic Compounds, or solvents) is an important part of caring for our environment. Government regulations such as SEO have meant the development of ever-lower solvent content in many typical primers and primer/finishes for steelwork. We have a wide range of products to supply the requirements of the fabrication and shotblasting markets.

- Long UK track record
- Technical support
- Wide product range

#### **ViterShield 178**

- 2 pack epoxy
- Primer/finish for steelwork
- High Solids (low VOC's)
- Very high build, fast overcoating
