

PBE Exchange

Custom Mix

How it Works

A Custom Mix can be ordered through PBE Exchange and is created by the distributor. To create a Custom Mix, select the desired quality from the Approved Product List (APL) and enter the formula information in the **Instructions for Distributor** during check out.

From the PBE Exchange home page, click **Create Order** in the header, then click **Catalog Order** from the fly out menu.

ADD TO CART

In the search field, type your three-character quality code and click the spyglass.

Note: If the 3-character quality code is not listed in your catalog, please email PBE-Exchange@axalta.com and request it be added.

Next, go to the **Quantity** column for your selected product and either type your amount or click the up or down arrows.

When finished, click **Add To Cart**. The **Success** prompt will appear indicating your selected product(s) have been added to your shopping cart.

When satisfied with your order, click the shopping cart icon in the top right corner of the page to check out.

Purchase Order Numbers

Enter purchase order number(s) or press Generate button to create a unique PO# for each order type. Note: A separate PO# is required for the Axalta products and the Allied products. Axalta products will be invoiced by Axalta and Allied products will be invoiced by the distributor.

Type your purchase order number(s) or click **Generate Axalta PO#**.

Note: If both PO# fields appear, type a purchase order number in both fields.

Go to the **Instructions for Distributor** field and type your formula.

Note: This is required so your distributor knows the specific formula number for your quality.

When finished, click **Place Order**.

Note: For the **Place Order** button to be active, all required fields must be completed.
