# Low VOC Product System

VALUE THAT LASTS

AN AXALTA COATING SYSTEMS BRAND

# Nason<sup>®</sup>XL Low VOC

Nason<sup>®</sup>XL is a Low VOC product system that is designed to provide long-lasting, collision-quality finishes at a price that fits any budget. The user-friendly refinish system can tackle all types of repairs with the fewest number of products and is easy to use with simple mix ratios and wide range application. With a compact line of products and color tools designed to help you achieve OEM color match, look no further than NasonXL for value that lasts.

## Collision-Quality Color Match

Nason<sup>®</sup>XL products are fast and easy to apply for a long-lasting, collision-quality finish. Achieving an accurate color match to thousands of vehicles with our basecoat color system has never been easier.

## Compact System

With a compact system of primers, sealers, basecoats and clearcoats, the NasonXL Low VOC product line is sure to have a paint solution for all your collision repair needs.

## User-Friendly Application

NasonXL products are straightforward to use with simple mix ratios and can be used in a wide range of applications.

## DTM Primer

This direct-to-metal grey primer provides excellent corrosion protection and optimum adhesion on OEM substrate and bare metals. Meets 2.1 lbs/gal VOC requirements.

**VOC:** 2.1 lbs/gal

Undercoat	Activator
431-12 2.1 VOC DTM Primer	431-14 Low VOC Standard Activator 431-15 Low VOC Slow Activator

## Primer Surfacer

A 1.9 lbs/gal VOC compliant high-build, 2K grey primer surfacer for automotive refinishing and new bodywork. Designed to provide an excellent substrate for all refinishing with excellent gloss holdout.

**VOC:** 1.9 lbs/gal

Undercoat	Activator	Reducer
431-31 2.1 VOC Primer Surfacer	431-14 Low VOC Standard Activator 431-15 Low VOC Slow Activator	437-00 Low VOC Reducer

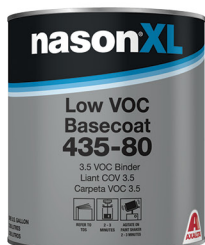

## Urethane Sealer

A 2.1 lbs/gal VOC, grey urethane sealer that applies smoothly and maintains superior color and gloss retention designed to increase inter-coat adhesion.

**VOC:** 2.1 lbs/gal

Undercoat	Activator
431-71 2.1 VOC Urethane Sealer	431-14 Low VOC Standard Activator 431-15 Low VOC Slow Activator

Clearcoat	Activator
438-11 2.1 VOC Panel Clearcoat	435-14 Low VOC Standard Activator
	435-15 Low VOC Slow Activator

# NasonXL Low VOC Color Tools

## Professional Color Selector

Sprayed fan decks chromatically organized make it quick and easy to find color within color families.

**Part number:** 3-NA455

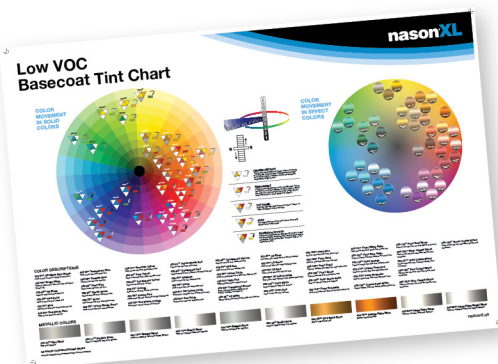

## Color Choice® Software

Color Choice provides an extensive library of 50,000+ color formulas with monthly updates for new and updated colors.

## Acquire® Color Compact Spectrophotometer

When paired with Color Choice, the Acquire Color Compact Spectrophotometer reads color and helps find the most accurate color formula.

## Color Movement Chart

Color movement charts provide visual tips on how to use toners to move color in the right direction, if necessary.

**Part number:** 3-NA528

# Additional Color Tools

## VINdicator\*

VINdicator is Axalta's exclusive color retrieval tool designed to help customers easily and efficiently select the right color formula using the Vehicle Identification Number (VIN). When used exclusively with ColorNet, VINdicator offers a simple alternative to other formula-retrieval options to assist customers in choosing the right formula when multiple variants exist for a given color.

\*VINdicator is only offered when used exclusively with ColorNet.
